https://www.youtube.com/watch?v=ijjwS6h-PyU

Epoch Times article mentions this manual for Dominion Voting Machines:

https://www.sos.state.co.us/pubs/elections/VotingSystems/DVS-DemocracySuite/documentation/EMS_RTR_UserGuide.pdf

Subdomain sos.state.co.us is online, domain state.co.us seems to be offline or at least has a cert issue while writing this (there is a cert for *.sos.state.co.us, but at state.co.us the cert is for *.colorado.gov). Here are the archives for state.co.us dating back to the year 2000)

Internet connection:

The pre-voting and post-voting groups of activities, in the process of defining and managing elections, are integrated within the Democracy Suite® EMS domain model and implemented in the two main end-user software applications:

- Democracy Suite® EMS Election Event Designer (EED)
- Democracy Suite® EMS Results Tally & Reporting (RTR)

Both applications are architecturally designed as rich-client applications for intranet deployment or, optionally, distributed for Internet deployment using VPN connections. This means that in addition to these client applications, the system integrates associated server platforms (the EMS Data Center back-end system) with required services and data repositories. Democracy Suite® provides the ImageCast® series of precinct and centralized tabulation devices for the full election cycle (pre-voting, voting, post-voting phases).

Curling v. Raffensperger

https://storage.courtlistener.com/recap/gov.uscourts.gand.240678/gov.uscourts.gand.240678.942.0_3.pdf

4. Upon our arrival, Ms. Marks and I were informed by Derrick Gilstrap, the manager of EPC, that all of the people working to upgrade the devices were

Dominion technicians. Mr. Gilstrap stated that he did not feel comfortable installing a last-minute software change, and did not want Fulton County staff to be responsible for installing it. He told us that he told Dominion to conduct this operation, prior to having his staff install the November 2020 election programming and Logic and Accuracy testing ("LAT").
